Business Analysis | Data Analyst | Operation Analyst | MBA

Chiragparmar7777@yahoo.com | 647-646-7353 | [LinkedIn URL](#) | Burlington, ON

Professional Summary

MBA-qualified Business Analyst with dual Canadian post-graduate certifications (Business Analysis & Product Management). Delivered a full BA lifecycle for the City of Hamilton, BRD, RACI, MoSCoW, 6+ use cases, and a 0–36 month AI roadmap. Placed 3rd in the HEAD Analytics Competition (935 public assets, ArcGIS + Power BI, ~150K residents impacted). Brings live SAP inventory operations experience at Loblaw/Fortinos, North American retail data expertise from Numerator, and self-built Excel/VBA forecasting tools, ready to contribute immediately in BA, DA, or Operations Analyst roles across FMCG, retail, and public sector.

Skills

Core Competencies: Requirements Elicitation, Stakeholder Management, Business Process Improvement, Gap Analysis, Use Cases, User Stories, MoSCoW Prioritization, RACI Matrix, Agile Methodologies, Data-Driven Decision Making, Solution Assessment & Validation

Tools: Power BI (DAX), SQL, Advanced Excel/VBA, ArcGIS, SAP, Jira, Lucidchart, MS Visio, Jama, Tableau, MS Office Suite

Work Experience

Perpetual Inventory Clerk / Retail Operations Associate Sept 2023 - Present
Fortinos (Loblaw Companies Ltd.), Burlington, ON

- Promoted to Perpetual Inventory Clerk (Apr 2026); perform SAP-based inventory reconciliation across DSD and warehouse receiving, issue vendor Proof of Delivery sign-offs, investigate variance flags, and execute full reclamation program to support loss prevention KPIs.
- Self-initiated and built an Excel/VBA predictive production planning tool for the Soup & Sandwich department (44 SKUs, 7 categories), 7-day rolling forecasts, automated waste threshold flagging, interactive analytics dashboard, and macro-driven workflow automation.

Business Analyst Intern May 2025 - June 2025
City of Hamilton, ON

- Delivered an AI integration strategy and scalable adoption roadmap for the Planning Department's inquiry workflows.
- Produced a full BRD covering stakeholder analysis, RACI matrix, SWOT, MoSCoW prioritization, 6+ use cases, risk register, and 0–36 month AI implementation roadmap for the Planning & Economic Development Department.
- Benchmarked AI adoption across Canadian municipalities; evaluated Archistar e-check pilot for scalability gaps and presented prioritized business case to city stakeholders aligned with federal AI governance framework.

Data Associate – Panel Oct 2020 - June 2023
Numerator, Vadodara, India

- Analyzed large-scale North American datasets to ensure data quality and validate business logic for marketing and consumer insights projects.
- Performed structured data quality checks and resolved inconsistencies prior to reporting.
- Built dashboards in Power BI to visualize transactional and demographic trends, enabling data-driven decisions.
- Collaborated across technical and business teams to streamline reporting.

Education

Post-Graduate Certificate, Business Analysis Sept 2024 - Jun 2025
Mohawk College, Hamilton, ON

Post-Graduate Certificate, International Business Management – Product Management Sept 2023 - Mar 2024
Mohawk College, Hamilton, ON

MBA, Marketing Jun 2018 - May 2020
Sardar Patel University, Gujarat, India

Bachelor of Commerce Jun 2015 - May 2018
M.S. University of Baroda, Gujarat, India

Project Work

- **HEAD Analytics Competition - 3rd Place Winner:** Mohawk College, Mar 2025
Analyzed 800,000+ public records across Hamilton's transit and infrastructure datasets using ArcGIS and Power BI, examining 935 public assets (228 schools, 632 parks, 75 recreation centers) to identify service gaps in underserved wards. Delivered 6 data-driven recommendations addressing transit gaps affecting ~150,000 residents.
- **Requirements Workshop:** Mohawk College, Dec 2024
Organized an online workshop to identify barriers in community mental health access. Used Padlet and Mentimeter for engagement, captured stakeholder needs, and proposed actionable improvement.
- **Soup & Sandwich Predictive Production Planning Tool:** Self-Initiated Project Mar 2026
Designed and built an Excel/VBA-based forecasting and waste analysis tool modeled on the Soup & Sandwich operation at Fortinos Upper Middle, covering 44 SKUs across 7 product categories. Features 7-day rolling production forecasts, automated waste analysis with SKU-level threshold flagging, an interactive analytics dashboard with month/week/category filters, and macro-driven workflow automation (one-click history save, auto-updating prediction windows). Reviewed and endorsed by the store's ASM.
